Dear Sir:

JOINT DECLARATION IN SUPPORT OF PETITION TO FILE PATENT APPLICATION WITHOUT SIGNATURE OF ONE INVENTOR

This Joint Declaration is filed pursuant to 37 CFR §1.47, and MPEP §409.03(d). This Declaration is submitted in support of a separate Petition to File Patent Application Without Signature of One of the Inventors.

In making this Joint Declaration, Peter L. Brewer and Thomas G. Hill, Jr. declare that the statements made herein of their own knowledge are true, and that all statements made on information and belief are believed to be true; and, further, that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under 18 USC §1001, and that such willful false statements may jeopardize the validity of the above-entitled patent application or any patents issued thereon. Peter L. Brewer's signature hereunder is made with respect to paragraph numbers 1, 2, 8, 9, 10, 11 and 12. Thomas G. Hill, Jr.'s signature hereunder is made with respect to paragraph numbers 3, 4, 5, 6, 7, 8 and 12.

1. Peter L. Brewer is an attorney with the law firm of Moser, Patterson & Sheridan, located in Houston, Texas. Mr. Brewer is licensed to practice law in the State of Texas and in the State of Tennessee. He is a licensed patent attorney, having Registration No. 41,636.

2. The law firm of Moser, Patterson & Sheridan, L.L.P. represents Weatherford/Lamb, Inc. in matters relating to intellectual property. Moser, Patterson & Sheridan had been retained to work with Tejas Research & Engineering, LP and Weatherford Completion Systems (formerly a division of Weatherford/Lamb, Inc.) in order to assist in preparation of the above-entitled patent application.

3. Thomas G. Hill, Jr. is the President of Tejas Research & Engineering, LP. Tejas Research & Engineering, LP is an engineering firm located in Houston, Texas. (See Appendix C). Tejas contracts with companies such as Weatherford for the design and development of tools for the oil industry. Tejas Research & Engineering was retained by Weatherford Completion Systems to aid in the design and development of a lockout tool for a safety valve, now the subject of the above-entitled patent application.

4. Engineers from Tejas Research & Engineering worked on the design and development of the lockout tool during the years 2001 and 2002. The engineers from Tejas Research & Engineering included Thomas G. Hill, Jr., T. Michael Deaton and Rory Hodge. Assistance was also provided by Neil A.A. Simpson with Astec Development Company in Aberdeen, Scotland.

5. A provisional patent application for the above-entitled patent application was filed on July 12, 2002. Mr. Hill, Mr. Deaton and Mr. Hodge assisted in the review of the provisional patent application before filing.

6. In early 2003, T. Michael Deaton left the employ of Tejas Research & Engineering, LP.

7. During 2003, the above-entitled patent application has been prepared, based upon the earlier provisional filing, and based upon review and input from Tejas engineers. However, because Mr. Deaton has not been employed at Tejas Research & Engineering, he has not been available to assist in the review of the patent application.

8. Attempts have been made to reach Mr. Deaton for his review of the patent application, and for his execution of an Oath or Declaration pursuant to 37 CFR §1.63. These efforts and attempts have been unsuccessful.

9. During April of 2003, attempts were made by Peter L. Brewer to reach Mr. Deaton by telephone. Subsequently, a letter was sent to Mr. Deaton enclosing a draft of the patent application and the requested Declaration. No response was received from Mr. Deaton. Appendix A represents documentation showing delivery of the materials, including the Declaration, to Mr. Deaton on April 30, 2003 via the U.S. Postal Service Express Mail No. EV 186612800 US.

10. Subsequently, on May 15, 2003, a second letter was sent to Mr. Deaton via Federal Express No. 790290158710. Appendix B shows a returned copy of the delivery receipt. No response was received from Mr. Deaton to the letter.

11. In addition, on May 15, 2003, an additional message was left at the last known telephone number for Mr. Deaton. No answer was provided to this message.

12. It is not believed or expected that Mr. Deaton will comply with the request of counsel to assist in the review of the patent application or to execute the requested Declaration. Mr. Deaton's departure from the employ of Tejas Research & Engineering was under conditions that render it unlikely to receive future aid and assistance from Mr. Deaton.

Further, Declarants sayeth not.

MOSER, Patterson & Sheridan, L.L.P.
